

FROM VISION TO DECISION

SEMINAR FRIDAY 18.02.11

PLACE: PETCentre, Dept of Radiology, Haukeland University Hospital

TIME : 12:00-13:00

PROGRAM

1200 - 1205 Welcome - Renate Grüner

1205 - 1215 Current Status Bergen PET Centre - Boel Johnsen, PETCentre

1215 - 1235 Multimodal imaging in Thyroid Cancer (Status MedViz project no. 9)

- Martin Biermann, PETCentre

1235 - 1255 Using PET for quantifying Glomerular Filtration Rate (GFR) in kidney

- Olav Tenstad, Dept of Biomedicine

1255 - 1300 Summary/ Discussion

ABSTRACT

The first MedViz seminar in 2011 is organized at the PETCentre, Department of Radiology, Haukeland University Hospital. The scientific program presents ongoing research activities at our PET Centre - examples from clinical and preclinical imaging, respectively. It is shown that the different imaging modalities contribute with complementary information - and as such PET has the potential to add value to many of the ongoing clinical and research activities in Bergen. The seminar is introduced by one of our physicians who will give an overview of the ongoing clinical activities at the PET Centre. After the seminar there is a possibility for visiting the clinical PET imaging system and "meet the locals".
